

A-Z PARTNERSHIP

LANGLEY PARK SCHOOL FOR BOYS NEW SCIENCE LABORATORY

At Langley Park School for Boys, the school was expanding its teaching facilities with the addition of two modular type buildings for general teaching and a science laboratory and prep room.

These building works required A-Z to work alongside the building company and the school to ensure that the furniture installation proceeded as smoothly as possible with all of the mechanical and electrical works being co-ordinated with the schools own preferred contractors.

The installation progressed very smoothly and all of the works were completed within the programme agreed with the school.

Just to say how pleased we are with our new laboratory which was completed recently. The quality of the furniture is excellent and the fitting team were extremely efficient, completing all works with the minimum amount of disruption and well within the time allotted. As a former Contract Manager I was most impressed with all aspects of this project, from Value for Money to pre-contract meetings right through to practical completion, A-Z have shown first class service delivery and a very professional approach to a difficult job. Chris Burchill handled the Project Management including the liaising with other contractors and Tony Woods has proved invaluable post completion, ensuring everything was in order during and after the works were finished. Both were available 24 hrs a day to answer queries and everyone at A-Z has gone the extra mile to provide complete customer satisfaction. We will have no hesitation in approaching A-Z again for future projects.

KEN PULLEN, SITE MANAGER

If you are considering a refurbishment, whether it be Science, Technology, Art or a general teaching classroom, we would welcome the opportunity to assist you in the development of your ideas. Contact us at:
