

A-Z PARTNERSHIP

PENKRIDGE MIDDLE SCHOOL SCIENCE LABORATORY REFURBISHMENT

Penkriddle Middle School is located in the village of Penkriddle, Staffordshire. In February 2007, the final go ahead was given to refurbish a laboratory at the School and so the process of gaining competitive quotations started.

A-Z Partnership were invited to provide a full turnkey quotation for the project as the scheme called for the complete strip out of all the existing furniture and equipment, minor alterations to the room and a new furniture layout to accommodate the students. A-Z Partnership attended several design meetings in order to ensure the design was exactly what the school required and, every step of the way, made sure that the science teacher who occupied the room, Mrs Gaynor Brotherhood, had every opportunity to provide input in order to arrive at the finished layout.

After refining the specification for all of the new fittings, flooring, decoration and installation programme, A-Z Partnership were appointed as the refurbishment contractor and work began at the start of the summer break. All of the existing furniture was removed, flooring taken up and services for gas, water and electricity were relocated to suit the new layout design. After all building works were completed, the furniture installation began and the full installation (including all building related works) was completed in less than four weeks.

The furniture and fittings were all manufactured to the high specification demanded by Staffordshire County Council and Quality Learning Services. The newly refurbished room now provides the pupils with a new, bright, flexible and innovative learning environment in which to discover science.

I am really pleased with how the lab has turned out. Thank you for the work you have done and the manner in which you have done it. It has meant that any disruption to teaching and learning for the pupils has been kept to a minimum which is really important to me. They now have a more up to date and, I hope, stimulating environment in which to learn. You have also been very professional and easy people to work with. Pupil feedback is overwhelmingly positive and other staff members here are also impressed.

GAYNOR BROTHERHOOD, SCIENCE TEACHER

If you are considering a refurbishment, whether it be Science, Technology, Art or a general teaching classroom, we would welcome the opportunity to assist you in the development of your ideas. Contact us at:
